The controversial proposal by the liberal Free Democrats (FDP) party would define sexual harassment in a broader way than now as a crime. "When it comes to sexual harassment, we need greater clarity," said Klaus Schwerin. "The current definition of sexual harassment doesn't match the reality of everyday life, so we need to change it." Schwerin said the Berlin law currently says that a criminal offense is committed when someone subjects another person to "sexual molestation" — an ambiguous description that can refer b7e8fdf5c8

PaGoDump is a free utility for PostgreSQL developers and administrators that makes database backups for PostgreSQL databases. PaGoDump allows you to set particular backup profiles and to generate backups for individual databases. Additionally, you can configure the compression level, output options and owner. Thus, after the execution of each backup, the information is saved in a file that you can examine. You may use PaGoDump - PostgreSQL to move and compress backups to ISO images. However, the program does not allow you to create compressed backups for individual databases. PaGoDump is a GUI-based utility and has a tabbed interface, in which each page is a step in the configuration process. Thus, you can create backups for specific databases and save them in a profile to be used with other applications. PaGoDump features a tabbed interface, in which each page is a step in the configuration process. Thus, the Connection tab is where you can specify the name of the PostgreSQL host, port, login credentials and database. Additionally, you may set the output format to PLAIN, TAR, COMPRESS or DIRECTORY in the Options tab. PaGoDump also allows you to choose from the options tab to set up the compression level, encoding method, the corresponding role of the output file and more. Additionally, you may clear the option "Show error during backup". Thus, you may customize the backup profile, by specifying the level of compression, encoding method and the corresponding role of the output file. PaGoDump allows you to choose from the options tab to create a full backup, which makes a complete backup of a database with all its data. Alternatively, you may choose the incremental backup mode, which backs up only the changed parts of the database and leaves the old data unchanged.
